Dear Hiring Manager,

I am writing to express my interest in the Frontend Developer position at IBM. As a final-year Bachelor of Computer Applications student with hands-on experience in modern frontend technologies, I am eager to contribute to a company known globally for innovation, scalable solutions, and technological excellence.

During my internship as a Frontend Developer at Netlink Software Private Limited, I worked on building responsive and user-friendly interfaces using React.js, JavaScript, HTML, and CSS. I collaborated with backend teams to integrate APIs, optimized application performance, and ensured cross-browser compatibility. This experience strengthened my understanding of clean code practices, component-based architecture, and performance optimization.

I have also developed personal projects, including dynamic web applications, where I focused on creating intuitive UI/UX designs and efficient state management. My GitHub portfolio reflects my commitment to continuous learning and practical implementation of modern frontend concepts.

What excites me about IBM is its commitment to solving real-world problems through technology at a global scale. I am particularly inspired by the company's focus on innovation and enterprise-level solutions, and I am motivated to contribute to building high-quality, scalable, and impactful user experiences.

I am a quick learner, detail-oriented, and comfortable working in collaborative environments. I would welcome the opportunity to bring my technical skills, enthusiasm, and problem-solving mindset to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to IBM's frontend development initiatives.

Sincerely,

Roshan Singh Baghel
